NEW UPRIGHT SHIPPER CASE

The new IC Biomedical Shipping Case is made of high-impact-resistant material to protect its contents from physical damage. The Case's domed top prevents stacking and its circular wide base encourages upright orientation during handling and transit.

With shipping times getting longer and package handling getting rougher, IC Biomedical has designed this Case to provide a safer, more secure enclosure for nitrogen vapor shippers.

A built in slot allows the case to be locked down for added sample security.

Designed for IC Biomedical shippers 4D, 4DX, CX100 and CXR100, the case is also compatible with most other similar sized shippers available on the market.
